what your best friend won't tell you

DO YOU EVER MONDER MHAT OTHER DEODLE THINK ABOUT YOU?

Sure, you're a good person on the inside. That's great, but the outside is important, too. Many guys aren't sure of the best way to take care of their bodies.

We've put together some tips that everybody should know to look their best.

HAIR

- Most people should wash their hair every three to four days. If it's really oily, wash it more often.
- Any shampoo is OK as long as it makes your hair and scalp feel clean.
- Comb or brush your hair every day, and don't borrow brushes or combs.
 Sometimes people get head lice from sharing combs and brushes.

FACE

- Everybody's face is different. Some have dry skin, some have oily skin.
 Some people get acne (pimples) and some don't.
- The center of your face is probably oilier than the outside edges.
- Use any soap you want, as long as it doesn't make your skin red, itchy, or flaky.

TEETH

You know how important your smile is. Protect it! All of the following helps to keep your breath fresh.

 Brush your teeth after each meal, at least twice a day. Brush your tongue, too. (That's right—your tongue. Your tongue has plaque-forming bacteria on

- it. Brushing it removes the bacteria that cause bad breath and plaque.)
- Toothpaste with fluoride is best. Use a soft toothbrush.
- Clean between your teeth once a day with dental floss. That is the special string made to clean film from between your teeth. You can find it in the store where you buy your toothpaste.

HANDS

- Wash your hands before you eat or prepare food.
- Wash your hands after you use the bathroom.
- Keep your fingernails clean and trimmed.

BODY

 Take a bath or shower every day. Plain soap is fine. Use any kind you want as long as it doesn't make your skin red, dry or itchy. Avoid strongly scented bath oils and bubble bath.

GENITALS

- Guys who have not been circumcised have skin (called the foreskin) that covers most of the end of the penis.
- It's important to clean under the foreskin during each daily bath or shower by gently

pulling it back and washing the penis. Then pull the foreskin back out to the end of the penis.

FEET

- Wash between your toes when you take a bath or shower. Dry carefully.
- Keep toenails clean. Trim them straight across.

DEODORANT/ ANTIDERSDIRANT

- Deodorant will not take the place of a bath or shower. If your deodorant causes a rash or makes your skin itch, switch brands.
- Apply deodorant after your bath or shower.

BATHROOM

- Wipe carefully after each bowel movement.
- Flush the toilet each time you use it.
- After you go to the bathroom, always wash your hands.

CLOTHES

- Wear clean underclothes and socks every day.
- Cotton underclothes are best because cotton absorbs moisture and lessens the chance for "jock itch," an infection on your skin which may look like chapping or redness of your penis, scrotum, and sometimes your upper legs.
- Try not to wear the same pair of shoes every day. Let them air out for a day before you wear them again.
